

CHANNEL SET BALUSTRADES

ion

■ GLASS FOR LIFE

An Ion Glass channel set balustrade provides an attractive, minimal and wholly frameless installation with the benefit of shorter lead times than our fully bespoke balustrade systems.

The channels make this a semi-bespoke system with greater flexibility with regards to measurement, facilitating a quicker result for a wide range of locations.

- Suitable for commercial, residential, church or heritage environments
- Internal or external installations
- Base or side fixed channel systems available
- Surface mounted, exposed or fully concealed channel fixing systems
- Curved or straight glass
- With or without a handrail
- The glass can generally be measured immediately with no requirement for templating

Ion Glass bespoke balustrades can be specified in a choice of fixings and finishes including:

- Clear float glass
- Low iron extra clear glass
- Sandblasted glass for an opaque or decorative finish
- Tinted or coloured glass
- Use a glass manifestation for a decorative result
- Digitally printed glass with full colour imagery
- Optional brushed or polished stainless steel handrails can be fitted as required
- Bespoke timber handrails available

We offer individual, location specific advice on the appropriate channels, glass size and glass specification to meet your requirements and ensure building compliance.

Unrivalled Service

All projects are surveyed to confirm the design, layout and to take initial measurements. All our installations are carried out by fully trained and experienced Ion Glass technicians, managing lifting procedures and logistics at all stages. Ion Glass guarantees that all our glass balustrade installations are BS6180:2011 compliant.
