Pro-Mesh

Difficult to climb & cut through

V-Mesh Fencing is the industry standard mesh fencing and typically used for medium security applications. Pro-mesh fencing has an attractive appearance and the open and strong mesh allows good visibility through it.

Pro-mesh panels are first galvanised and then polyester powder-coated to RAL 6005 green or RAL 9005 black.

- Attractive appearance, long-lasting, powder coated finish
- Aesthetically pleasing, blends in with surroundings
- Choice of heights
- Full range of RAL colours available

SPECIFICATION

Posts	Varying from 60x40mm to 80x60mm RHS depending on height.				
Height	1.2m	1.8m	2.0m	2.4m	3m
Mesh Size	200x50mm with 5mm horizontal wires and reinforcing V-profiles. 3m widths.				

Pro-Twin

Ideal for multi-purpose (MUGA) games areas

Our Pro-Twin wire perimeter fencing combines a perfectly engineered robust design with a low visual impact that will blend into almost any situation.

Durability is a key requirement of any sporting perimeter and features as standard across our Pro-Twin double wire panel MUGA fencing system. This makes it the perfect choice when you are looking for strong-yet-practical fencing for your school, football ground or MUGA (multi-purpose game area).

- Economic security solution
- Anti-vandal fasteners
- Strong cut resistant double wire panels
- Wide range of height options
- 656 standard wire type - 868 option for heavier gauge wire
- Available in a wide range of RAL colours

SPECIFICATION

Height	1.2m	1.8m	2.0m	2.4m
Posts	Post section vary from 60x40 to 100 by 50mm depending on height.			
Mesh Size	The apertures of the mesh will be 200 by 50mm with an option of either a standard 6mm wire or the heavy duty 8mm wire.			

Pro-Sure 358

High security 'prison mesh' fencing

Our Pro-Sure 358 mesh panel fencing, also known as Prison Mesh, is suitable for areas where higher security is necessary.

Good through-visibility means the area on the other side of the fence can be monitored easily, while the fine mesh prevents items being passed through the fence and makes the fence difficult to cut or climb.

- High security
- Attractive appearance, despite dense wire mesh
- Rigid welded steel wire mesh panels
- Very wide choice of heights & RAL colours
- Available in Secured by Design option

SPECIFICATION

Height	2m	2.4m	3m	3.6m	4m	5m	6m
---------------	----	------	----	------	----	----	----

Panel Width	2.45m
--------------------	-------

Mesh Size	12.7 x 76.2mm
------------------	---------------

Finish	Galvanised and polyester coated in a range of RAL colours
---------------	---

Pro-Play Roll Top Fencing

Child safe fence panels for Playgrounds and School applications

Roll Top is a welded mesh panel fence that has a rolled top and bottom edge for enhanced safety and rigidity. The open mesh profile is also decorative and allows excellent through visibility.

- Suitable where safety is a consideration
- Aesthetic appearance
- High rigidity
- Excellent through vision
- Wide range of colour options
- Available as a complete system

SPECIFICATION

Height 0.9m 1.2m 1.5m 1.8m

Panel Width 3000mm

Mesh Size 150 x 50mm

Finish Galvanised and polyester coated in a range of RAL colours

PLAYSAFE & RoSPA Railings

Anti Trap Bow Top fencing provides permanent protection for play areas. A key point in the design is the wider gap between each hoop above the top rail. This prevents children getting their heads, necks or limbs stuck between pales. The design fully conforms to play fence standards in BS EN 1176.

- Follows ground contours - no stepping required
- Choice of heights from 0.9m to 2.4m
- Panels can be straight or curved
- All posts have welded caps
- Matching gates available
- Available in Secured by Design option
- RAL colours
- RoSPA approved
- Matching gates are available with optional self-closing operation

Palisade Fencing

Perfect for deterring intruders

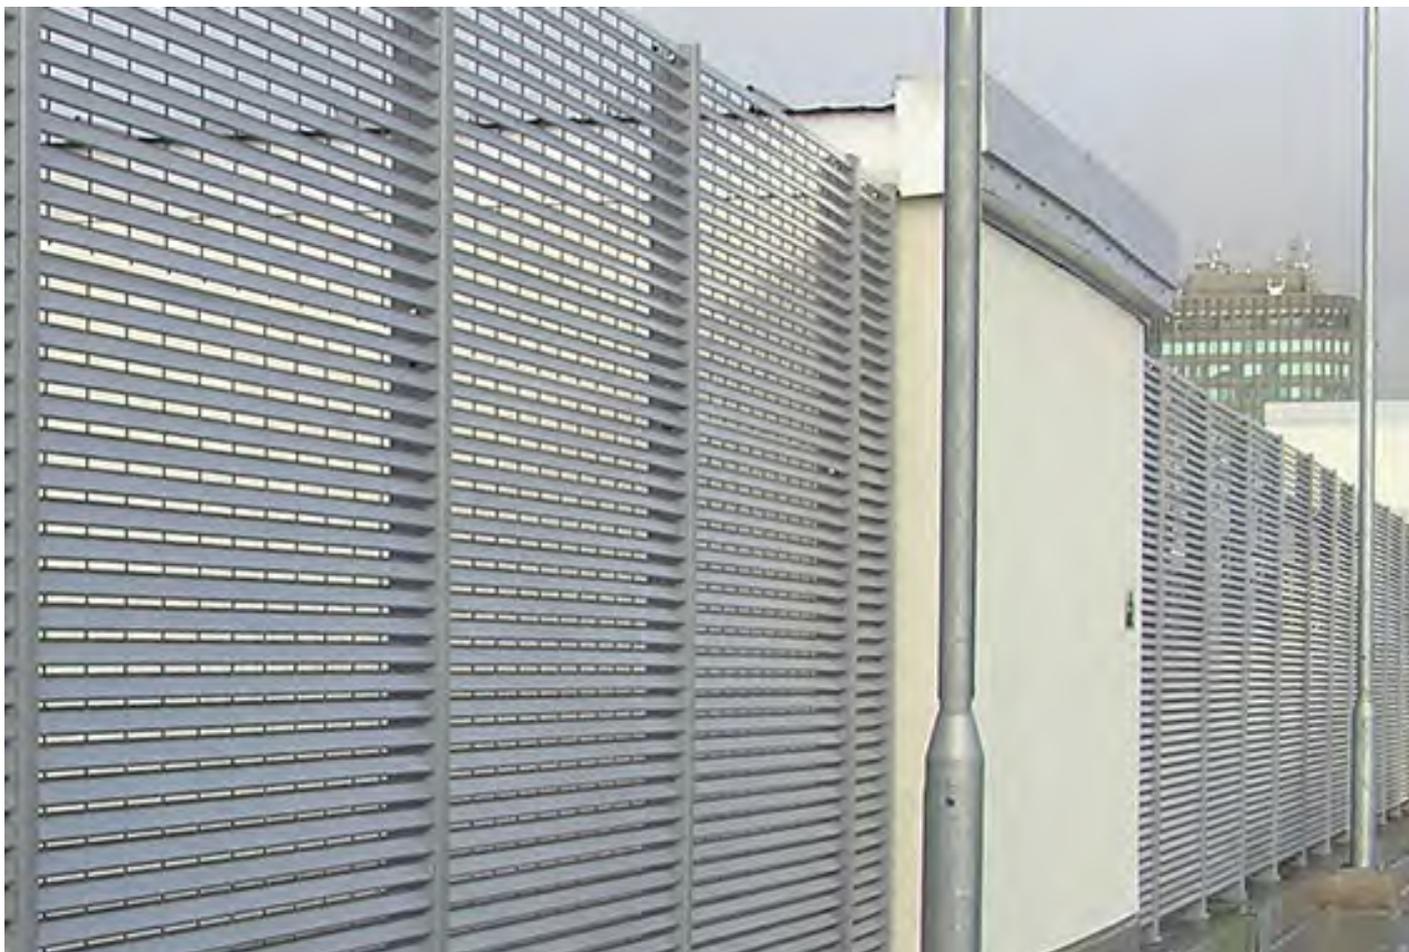

Palisade fencing is a strong, robust and often imposing fencing solution that is ideal for warehouses and industrial sites.

With high damage resistance and an advantage of being difficult or impossible to climb, palisade fencing is ideal for premises where keeping intruders out is essential.

Procter's palisade fencing is supplied in kit form for on site erection, supplied with 1 post, 2 rails, 17 triple pointed pales and all your security fixings.

SPECIFICATION

Heights	1.8m 2.0m 2.4m 3m 4m
Pale Profile	'W' or 'D' section
Pale Topping	Triple pointed or rounded.
Posts	Varying from 102x44mm to 127x76mm RSJ

Procter Louvre Screening

Architectural louvre screen panels to conceal unsightly equipment and prevent intruders, whilst enhancing a building exterior.

When limiting the visibility of your premises is as important as preventing people from intruding, choose Procter Louvre screening.

This louvre system combines exceptionally stylish and modern panels with features designed to protect high level security sites including hospitals, airports and corporate developments.

A range of options allow you to customise the innovative Procter louvre screening to meet your security needs. Each panel is available in any height, and you can choose different visibility levels based on the angle of the louvres. The 80/20 option provides 80% screening with 20% visibility, while the 100/0 option provides 100% total screening with zero visibility.

Louvre screens can be used in industrial and commercial buildings to conceal unsightly heating, ventilation, and air conditioning (HVAC) systems.

Single or double access doors can be included and panels shaped to accommodate ducting, parapet walls, conduit or any roof obstruction. Products are finished hot-dip galvanized with an optional powder coated to any RAL colour.

Palisade Gates

Medium-to-high-security entrance gates for pedestrian or vehicular access

Palisade gates are especially popular as they are often combined with our palisade fencing and together offer an effective security solution.

They are available in a range of standard heights and specifications to match the style of fencing. They are available as single-leaf or double-leaf swing gates, the latter offering openings up to 16 m wide.

Customers can select from a choice of heights and either W- or D-section pales, depending on the level of security required and whether the gate needs to match palisade fencing. All of our palisade gates are hot-dip galvanised for long-lasting corrosion resistance, and can optionally be finished with a tough polyester powder coat in a range of standard colours.

We stock gates in 1.8 m and 2.4 m high variants for immediate delivery or collection.

Pro-Mesh Gates

Perimeter protection secured with tamper-proof fixings

Procter mesh security entrance gates are high-quality, versatile yet cost-effective for low, medium or high-security applications. Manufactured in a choice of heights and widths, they can be used singly or in pairs for pedestrian or vehicular access, with the widest opening being 16m.

Our mesh gates feature robust frames fabricated from square hollow section (SHS) steel, with infills in a variety of welded steel wire meshes to match the mesh panel fencing that we supply. All of our mesh gates are hot-dip galvanised for long-lasting protection against corrosion, with a tough polyester powder coat applied on top.

We hold stocks of single-leaf and double-leaf swing gates in heights of 2.0 m and 2.4 m for immediate dispatch or collection from our depots. Stocked gates have heavy-duty twin-wire mesh infill to the same specification as our Pro-twin mesh panel fencing and a Moss Green RAL 6005 finish. Moreover, we can supply gates on short deliveries with alternative mesh infills and in different RAL colours.

All gates are supplied complete with hanging posts, adjustable hinge fittings, drop bolts and slide latches with a facility for a heavy-duty padlock.

We stock gates in 1.2m, 1.8 , 2.0m and 2.4m high variants for immediate delivery or collection.

Acoustic Fencing, Barriers & Walls

We offer a choice of products, including absorptive and reflective types of barrier, and different materials of construction - either traditional timber or maintenance-free composites.

Timber acoustic fencing has qualities that help create a barrier to noise. For this reason, acoustic fencing is often used as a boundary fence adjacent to motorways and other busy roads that are close to residential areas.

Our **Pro-Acoustic** Environmental Noise Barrier System is manufactured from high-strength glass-reinforced polymer with mineral wool infill, resulting in a long-lasting, maintenance-free product. Each Pro-acoustic noise barrier consists of highly durable panels that will not warp or shrink, are rot-proof and resistant to aggressive environments including salt spray and oils – all without the need for additional treatment.

SPECIFICATION		SOUND REDUCTION				
Height	1.8m-7m	Distance from noise source	5m	10m	15m	20m
Thickness	22mm		2m fence	13.6 dB	11.3 dB	10.3 dB

Timber Fencing Range *NEW FOR 2021*

We stock a wide range of high quality feather edge fencing boards and panels to suit every fencing application you require.

If you're looking to create a sturdy boundary for your garden, with privacy and security a priority, our timber fencing range is the perfect solution.

This classic type of fencing offers a robust and timeless addition that sits perfectly within both modern and traditional settings.

LARGE STOCK • FAST DELIVERY • BEST PRICES

Fence Posts

Strong, stylish and versatile. Built to last.

Made of cold rolled galvanised steel, the new DuraPost® complements the beauty of wood with the strength of steel to create durable fencing that's quick to install.

Available in Sepia Brown. Other colours available on request.

RELIABLE

Quality and peace of mind is important to us. It's why we have tested DuraPost in winds of up to 110mph and offer up to a 25-year guarantee*. We're confident they can stand up to the task.

VERSATILE

DuraPosts work with virtually any type of fencing, so you can tailor a solution to suit you and your garden.

HASSLE FREE

DuraPosts are easy to fit, taking roughly half the time to fit than some traditional fence posts. They're maintenance-free too.

STRONG AND SECURE

DuraPost's pre-drilled holes mean fence panels can be securely fixed, unlike concrete posts that allow panels to be lifted up and out.
