

Special Applications

Working together with customers, we use our industry knowledge, technical expertise and cutting-edge equipment to develop and deliver solutions to solve any challenges they face.

Through investment in computer design software and CNC machinery, we can manufacture items such as special purpose access covers, edge trims and corner guards quickly, accurately and cost effectively.

New product development is an everyday occurrence at Howe Green.

Shown here are just some examples of special works. Call office to discuss any requirement you may have.
