

## Pro Mesh Fencing

Generated on 02.10.2017

### Detailed description

Pro-mesh panel fencing is typically used for medium security applications, with the nature of the mesh panels making it difficult to climb and cut through. Pro-mesh also has an attractive appearance and the open yet very strong mesh allows good visibility through it.

Standard heights are 2.0m and 2.4 m, with the finish galvanized and polyester coated in a range of standard RAL colours and non-standard colours if required.

### Applications:

- Car parks.
- Sports and recreation.
- Perimeter - medium security.
- Schools.
- Retail.
- Industrial units.

### Product guidance - As Standard

#### Bay width:

2750 mm.
