

Client: 2 Sisters Food Group

Project: Interior Building Drainage

The 2 Sisters Food Group supply around a third of all the poultry eaten in the UK every day.

Component Developments have supplied products to the factory for many years. On this particular project, the existing large store area had one small shallow gully which was totally inadequate for the new chill room.

In order to solve this problem, Component Developments designed and supplied a long T shape drainage channel system; the main stem of the T was centred on the room as a wash down facility, which is constantly trafficked by pallet trucks.

Stainless Steel: Drainage Channels | Gratings | Trapped Gullies | Rodding Eyes | Access Covers | Corner Guards | Crash Rails | Kerbs | Special Fabrications

Accreditations: ISO 9001:2008 Quality Assurance | ISO 14001:2004 Environmental Management | OHSAS 18001:2007 Occupational Health & Safety

Component Developments is a division of Webster-Wilkinson Ltd.
