KIOSKS

A range of portable GRP kiosks which are available off the shelf for quick delivery. These high quality buildings suit both indoor and outdoor applications and come in four standard layouts. Popular applications include security control and gatehouses, toll booths and car parking assistant cabins, ticket sales and vending kiosks, visitor and delivery check-in, and as an attractive and focal information point for heritage and leisure sites.

Guiding the Visitors of Porth Y Wrach

The Genesis™ GRP Kiosks offer the ideal focal point for visitors seeking beach wardens.

Robust, sturdy, and adaptable, the Genesis GRP Kiosks are suitable for various outdoor applications, including ticket and information points, security checkpoints and sentry posts. Insulated and weather-resistant, the kiosks are a low-maintenance and affordable housing solution.

Following on from a previous delivery of Genesis Kiosks in 2017, Anglesey County Council returned to Glasdon for a further two warden housings. Pleased with the durability and weather resistance of the Genesis GRP 2.3 x 1.5m Kiosk, choosing a housing option was easy, and two Genesis Kiosks were selected to meet their needs.

Known for being one of the best slipways in Anglesey for launching watercraft, Porth Y Wrach slipway in Menai Bridge is a popular paradise for water sports. Accessible virtually 24/7, the slipway is a common destination for residents and visitors alike and, with the addition of a Genesis GRP Kiosk, provides access to wardens for information and guidance.

During the off-season, built-in forklift points enable the kiosks to be transported to warehouses for storage or repurposed elsewhere until required again.

Fitting custom imagery to the kiosk, Anglesey County Council adapted their warden housing to promote local scenery and important contact information. A friendly 'Respect The Water' message is also a prominent panel feature, reminding visitors and residents to clean up after themselves.

HOUSINGS

We also specialise in the design and build of GRP Housings and Enclosures and Steel Housings for the secure storage of a wide range of equipment including generators, switch gear and valves, monitoring equipment, control panels, substations, meters, mobile and broadband networks, and power supply rooms.

CABINETS

These steel cabinet enclosures offer a long term solution to house and protect instrumentation and electrical equipment. With the option of either double-skinned, insulated construction or our economical single-skin range, our cabinets have become a popular choice for metering and electrical panels.
